

Zeel Shah

Software Engineer

Experience

May 2025 – Current

Staff Frontend Engineer

Lightup data India Pvt. Ltd.

- Own frontend architecture for the monitoring experience, leading an end-to-end redesign of the monitor page from information architecture through delivery using React and Ant Design.
- Designed and shipped the LLM management surface (full CRUD), giving customers a first-class workflow to configure and operate LLM-backed data quality monitors.
- Architected core components of the Energy design system, defining shared component APIs, patterns, and documentation adopted across product teams to accelerate UI delivery and enforce consistency.
- Led a major tech debt initiative, migrating the application from React 16.4 to React 19 and Ant Design v3 to v6, and introduced RTK Query for data fetching and caching, measurably reducing bundle size and application load time.
- Set frontend technical direction through design and code review, and mentor engineers on component and state management patterns.

Oct 2024 – May 2025

Mobile Engineer · Part-time

Toast

- Built features for the Toast mobile app and delivered an iOS app in React Native, taking it through App Store review to release.

Nov 2020 – Sept 2024

Senior Software Engineer (Frontend) · Apr 2022 – Sept 2024

Software Engineer 2 (Frontend) · Nov 2020 – Mar 2022

Tekion India Pvt. Ltd.

- Promoted to Senior Software Engineer for consistently owning delivery of the CRM module end to end.
- Led CRM module development, including end-to-end planning, scrum facilitation, and cross-functional coordination.
- Spearheaded the CRM Reports Module from scratch for web.
- Contributed to the Template Builder module using React.
- Gained 1.5+ years of experience in React Native for mobile development.
- Regularly provided accurate delivery estimates to product teams and ensured adherence to deadlines.

May 2019 – Oct 2020

Software Engineer 2 (Frontend) · Apr 2020 – Oct 2020

Software Engineer 1 (Frontend) · May 2019 – Mar 2020

Swiggy

- Promoted to Software Engineer 2 within the first year for ownership of high-traffic consumer surfaces.
- Developed Swiggy Super landing page using server-side rendering with Express.js.
- Built and maintained features in the web application using React and TypeScript following TDD practices.

Seasoned Frontend Software Engineer with 12+ years of experience in building scalable web and mobile applications. Proven track record of leading engineering teams, driving full project lifecycles from conception to deployment.
