ZEEL SHAH

Staff Frontend Engineer

Bangalore, India · kshah215@gmail.com · +91 95609 35248 · zeelshah.com

SUMMARY

Frontend engineer with 12+ years building and owning web and mobile products end to end. Recently the sole frontend architect for a data-quality platform, owning the design system, rendering architecture and a full React 16 to 19 modernization. Deep in React, TypeScript, React Native and server-side rendering, with recent experience shipping LLM-backed product surfaces. Previously at Swiggy, Sprinklr, Tekion and Qubole.

EXPERIENCE

Lightup Data India Pvt. Ltd. May 2025 – Sept 2026

Staff Frontend Engineer

- Sole frontend architect for the platform, owning architecture, design system, build tooling and delivery across the entire product surface as part of a two-person frontend team.
- Built and maintained the Energy design system — 48 components, 9 authored from scratch — defining shared component APIs, composition patterns and documentation that standardized UI across the application.
- Led a full frontend modernization: React 16.14 to 19, Ant Design v4 to v6, and CRA/Webpack to Vite. Introduced route-level code splitting that decomposed a single 7.3 MB bundle into 141 chunks, cutting initial-load payload by 45% (2,589 KB to 1,421 KB gzipped). Migrated data fetching to RTK Query, unifying caching and request handling.
- Designed and shipped the LLM management surface (full CRUD), giving customers a first-class workflow to configure and operate LLM-backed data quality monitors.
- Re-architected the monitoring experience, leading an end-to-end redesign of the monitor page from information architecture through delivery.
- Set frontend technical direction through design and code review, and mentored engineers on component and state management patterns.

Toast Oct 2024 – May 2025

Mobile Engineer · Part-time

- Built features for the Toast mobile app and shipped an iOS application in React Native, taking it through App Store review to release.

Tekion India Pvt. Ltd. Nov 2020 – Sept 2024

Senior Software Engineer (Frontend) Apr 2022 – Sept 2024

Software Engineer 2 (Frontend) Nov 2020 – Mar 2022

- Owned the CRM module end to end — planning, scrum facilitation and cross-functional coordination — and was promoted to Senior for consistent delivery ownership.
- Built the CRM Reports module from scratch for web.
- Contributed to the Template Builder module in React.
- Delivered mobile features in React Native over 1.5+ years alongside web development.

Swiggy May 2019 – Oct 2020

Software Engineer 2 (Frontend) Apr 2020 – Oct 2020

Software Engineer 1 (Frontend) May 2019 – Mar 2020

- Promoted within the first year for ownership of high-traffic consumer surfaces.
- Built the Swiggy Super landing page using server-side rendering with Express.js.
- Developed and maintained web application features in React and TypeScript following TDD practices.

Qubole Oct 2017 – May 2019

Member of Technical Staff

- Integrated Google Cloud support into Qubole's data platform using Ruby on Rails and JavaScript.

Sprinklr India Pvt. Ltd. Oct 2015 – Oct 2017

Product Engineer (Frontend)

- Migrated the publishing module from a Backbone MVC architecture to React, and maintained the legacy stack through the transition.

Aspiring Minds Pvt. Ltd. Jan 2014 – Sept 2015

Software Developer (Full Stack)

- Designed a normalized question-bank database in MySQL and built internal tooling with PHP and Python.

SKILLS

Core React, TypeScript, JavaScript, React Native, Next.js, Server-Side Rendering

State & Data Redux, Redux Toolkit, RTK Query

Design Systems & UI Design system architecture, Ant Design, Tailwind CSS, CSS, HTML

Build & Tooling Vite, Webpack, code splitting, bundle optimization

Backend Node.js, Nest.js, Express.js, Firebase

AI LLM product surfaces, prompt engineering, Claude Code / Cursor / Copilot

EDUCATION

MBA (Operations) — Amrita Online, 7.47/10 2023 – 2025

B.Tech (ICT) — DA-IICT, Gujarat, 8.46/10 2010 – 2014
